

**Date: 8th August 2024**

**Admin dashboard latest observation doc:**

**Point 1:** In the user bookings section, please find the changes below:

**1.1** In View tickets option, for upcoming bookings the admins should get a functionality to Cancel & refund the amount.

**1.2** For Failed payments, no need to generate a ticket, in these failed payments view tickets are showing as upcoming trip, Tickets to be created only if the payment is successful. Refer to the screenshot below:

1.4 In the view ticket section, the Ticket View UI Date & Day entry is missing [For ex: Mon 4th July] and Logo to be added in the centre of the Tickets QR. Refer to the tickets UI design on the Figma.

Important point, IN FCFS no seat allotment but in the ticket generated its showing ticket number for FCFS bookings, Seat number should display as “Not Applicable” for FCFS booking, refer to the screenshot below:

1.6 Booking ID is lengthy, can we minimise it, for ex: RB1T12345  
RB stands for Routebus, Followed by number and T stands for Ticket  
By Keeping the above booking id, it's easy to remember and it also resonates with the brand name. Booking Id can be generated in a series starting from RB1T1, RB1T2, RB1T3,.....etc.

Point 2:  
In the Add route section, while adding a new route facing these errors shown below:

2.1 From & To location we have to choose it from the drop down, instead it should ask for a input field to enter the location names.refer to the screenshot below:

2.2 Last point fare is getting auto-calculated based on the base fare, so both the fields should be input fields. refer to the screenshot below:

Recheck the complete onboarding flow through Admin dashboard, try onboarding two or three bus operators fully on this admin dashboard, facing multiple bugs on this journey.

---

**Point 4:** In the payment management, Options to create a new settlement are added, so we can manually transfer the amount to the bus operator bank account & add the details here.

---

**Point 5:** In the bus owners section, need to add a column called “onboarding status” Onboarding status tells us how much Percentage the operators have onboarded, incase of not fully onboarded operators, we will get on a call with them and assist them to complete the onboarding. Already on our activation form we have 10 steps, each step contributed for 10%. Based on this logic we can create an onboarding status Percentage.Refer to the screenshot below

For ex: Onboarding status = 10% / 20% / 100%

**Owners**

Search owner by name  Search owner by mobile  Filter by Status: All Add Owner

#	Mobile	Name	Email	Bank Name	IFSC Code	Account No.	Onboarding Status	Approval Status	Active	Action

5	35544444	dhhd	Only stagecarriage	9878666791			hfhf	<input type="checkbox"/>	

**5.2** Need to add the created date for bus Owners & Bus Listings, this date is the date when they create an owner account or created date for the bus.

**Buses should be live on customer app post fulfilling all the below conditions:**

Condition 1: Owner Onboarding status = 100%

Condition 2: Owner Approval status = Accept

Condition 3: Owner Active = Yes

Condition 4: Bus Onboarding status = 100%

Condition 3: Bus Active = yes

Only if all these conditions are fulfilled, then the buses should live on the user App platform.
