Observations & Changes proposed on the Admin dashboard:

1. In the Dashboard Home page, please add these metrics mentioned below:

Filter Options	Date	City

Booking metrics				
Total Bookings	Total Earnings ₹	Cancellations	Upcomings Bookings	Number of Cities Live

Operator Metrics				
Total no of operators	Signup Pending Operators	Total buses onboarded	Total Drivers onboarded	Total Conductors onboarded

User Metrics		
Total Registered users	New users registered today	Average ticket value

User Growth Chart Comparison

User Growth (Last 7 Days)
2. In the Customer list, please find the list of requirements below:

★ Need input box to search the customers through a customer mobile number. Refer to the screenshot below.
★ Need to add the total customer bookings, Referred by (Referrer name/No), Revenue and cancellations as columns over here to find the customer overall metrics.
★ Sort option through wallet points, Revenue,Bookings, Cancellations.

3. In Customer wallet, admins should get an option to add the negative adjustments also, incase of wrong credit on wallet, manual debits can be made using the admin panel. Current option is to only add the wallet points, no option to add the negative wallet points for adjustments. Refer to the screenshot below.

4. In Bus owner, please find the list of changes below:
   ★ Search functionality through the mobile number, right now the search functionality on name.
   ★ Filter options the Approval status, this will agents to investigate the bus which are in pending status.
   ★ Add these parameters - City, Number of Buses here on the bus owner sections

Stop 7								10	20
Stop 8									10

Time Chart sample below:

Time Chart							
UP Trip	**Start point Time**	**Stop 1**	**Stop 2**	**Stop 3**	**Stop 4**	**End Point Time**	**Down Trip**
Trip 1	9.00 AM	10 Mins	15 Mins	25 Mins	30 Mins	45 Minutes	
	45 Minutes	30 Mins	25 Mins	15 Mins	10 Mins	10.00 AM	**Trip 2**
Trip 3	11.00 AM	10 Mins	15 Mins	25 Mins	30 Mins	45 Minutes	
	45 Minutes	30 Mins	25 Mins	15 Mins	10 Mins	12.00 PM	**Trip 4**
Trip 5	1.00 PM	10 Mins	15 Mins	25 Mins	30 Mins	45 Minutes	
	45 Minutes	30 Mins	25 Mins	15 Mins	10 Mins	2.00 PM	**Trip 6**

Start point time for Up trip & Down trip are Actual time when we are collecting while onboarding, we can populate the same data over the fare chart.
Other timings mentioned on stops are time taken to reach from the start point, this data is also collected through onboarding, we can populate the same data over the fare chart.

6. **In the User bookings, please find the changes below:**

★ Each and every booking should generate a unique ID which will be considered as a Ticket id, the same ticket Id is visible for the
★ Booking status such as completed, In-Progress, Cancelled, advance booking to be added over the column
★ Search functionality through Bus number, Ticket ID, Customer Contact Number and the booking status on the user Bookings sections.
★ Refund options for the bookings, can we add the refund button on booking.
★ Option to view the tickets, UI is similar to customer APP ticket UI view.

7. **Operator Settlements [Need to add this section]:**

This section is where the operators will get the daily amount(Settlements)

Each & Every settlement should have a unique settlement ID.

Filter options through the Operator number & Date

These below mentioned parameters are to be added:

Sno, Settlement ID, Date & Time, Amount, Bank Reference No, Operator name, Operator Number, Payment status.

8. **Operator metrics [Need to Add this section]:**

This section clearly highlights the overall metrics of the operators.This section will display key performance indicators (KPIs) for a quick overview. It could include:
